- Sports

Profile

Computer Science graduate with hands-on experience in **Artificial Intelligence, Machine Learning, and Deep Learning**. Skilled in developing intelligent systems, data-driven applications, and automation solutions. Passionate about solving real-world problems using AI, with expertise in model development, data preprocessing, and deployment. Always eager to learn, adapt, and contribute to innovative projects.

Education

Bachelor of Computer Science — Bahria University

2021 – 2025

Intermediate (ICS) — KCWU

2019 – 2021

Matriculation (Science) — LGS

2017 – 2019

Projects

• AI Powered Car Parking System

Developed an intelligent parking management solution using computer vision and machine learning to detect available slots and optimize space utilization.

• Food Quality Classifier

Built a classification model using machine learning to assess and categorize food quality based on image data.

• Fake News Detection

Designed a Natural Language Processing (NLP)-based model to identify and classify fake news articles with high accuracy.

• IntelliDoc QA Assistant

Built an AI-powered full-stack app (React + FastAPI) that answers user queries from uploaded PDFs using NLP models.

Technical Skills

Programming Languages: Python, C++, JavaScript, SQL

AI & ML Tools: Machine Learning, Deep Learning, Artificial Intelligence, Natural Language Processing (NLP), Data Analysis, TensorFlow, PyTorch, Scikit-learn

Web & Database: HTML, CSS, jQuery, SQL Server

Core Competencies: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management, Problem Solving
