

Ali Janjua

QA Engineer / Software Test Engineer

Islamabad. • +923115000567 • alijanua254@gmail.com • <https://www.linkedin.com/in/ali-janjua/>

Experienced QA Engineer with a proven track record in ensuring the delivery of high-quality software products. Skilled in reviewing requirements, devising comprehensive test plans, and creating detailed test cases to meet client needs. Proficient in leveraging automation tools like Selenium and Cypress to enhance testing efficiency, all while maintaining a keen understanding of the Software Development Life Cycle (SDLC). Recognized for adept problem-solving abilities, analytical prowess, and unwavering commitment to integrity. A high-energy professional known for driving projects to completion while maintaining a keen focus on quality and efficiency. Skilled in fostering collaborative relationships with stakeholders and mentoring junior team members to achieve project success. Committed to continuous improvement and driving process enhancements to meet evolving client needs.

Experience

FEB 2022 - PRESENT

QA Engineer • Contour Software • Islamabad (Hybrid)

- Led requirement analysis, estimations, and SCRUM ceremonies while collaborating seamlessly with cross-functional onshore team members across multiple diverse projects.
- Formulated comprehensive risk assessments and test plans for functional and regression testing.
- Conducted exhaustive UI and functional testing, executed log level analysis, verified API and database functionality across various product categories, including ERP systems, websites, and mobile applications.
- Effectively managed test cases and tracked bugs with precision using JIRA Xray, while spearheading automation efforts using Cypress and integrating CI/CD pipelines, achieving ~ 80% regression coverage.
- Actively engaged in process improvement initiatives and played a pivotal role in mentoring junior team members through onboarding and day-to-day project activities.

SEP 2020 – FEB 2022

SQA Engineer • TPL Trakker • Islamabad

- Directed multiple testing cycles, including the strategic creation of test plans and the development of scripts, collaborating closely with developers, project managers, and key stakeholders to ensure on-schedule testing completion for websites and applications.
- Achieved a remarkable automation rate of approximately 85% by implementing Selenium, significantly reducing regression testing time and future workload.
- Conducted rigorous testing of TPL Maps Location-based Services (Rest APIs) using Postman and orchestrated load testing using JMeter, simulating high-volume traffic of around 2500 concurrent users.

Skills

Test Planning • Functional Testing • Non-Functional Testing • Test Automation • Regression Testing • Bug Reporting • Defect Tracking • Performance Testing • Test Data Management • API Testing • Git • SQL

Education & Certifications

ISTQB Agile Tester

2022

Bachelor of Science in Computer Science | COMSATS University | Islamabad

2020
