EDUCATION

- Bahria University** Lahore, Pakistan
Bachelor of Science in Computer Science; CGPA: 3.57 Oct 2022 - July 2026
Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Data Structures & Algorithms, Database Systems
- Forman Christian College** Lahore, Pakistan
FSc Pre-Engineering Aug 2020 - May 2022

TECHNICAL SKILLS

- AI & Machine Learning:** PyTorch, TensorFlow, Keras, Scikit-learn, Transformers, BERT, GPT Fine-tuning, Computer Vision, NLP, CNNs, Transformers, Transfer Learning
- LLMs & Generative AI:** RAG (Retrieval-Augmented Generation), Prompt Engineering, Model Context Protocols (MCPs), OpenAI API, Whisper
- Vector Databases & Retrieval:** Pinecone, Embeddings, Semantic Search, Document Chunking
- MLOps & Deployment:** FastAPI, Django, Docker, AWS, Kubernetes, Model Serving, API-based Inference
- Languages & Tools:** Python, C++, JavaScript, SQL, Git, Postman, Hugging Face

EXPERIENCE

- WAMO Labs** Lahore, Punjab (On-site)
Associate Software Engineer April 2025 - Present
 - Service-Based AI Development:** Worked on multiple client-facing AI projects, delivering end-to-end intelligent systems across different domains including e-commerce, automation, and knowledge assistants.
 - LLM Systems & MCPs:** Designed and implemented custom **Model Context Protocols (MCPs)** to standardize interactions between large language models and application services, improving consistency and reusability across projects.
 - RAG Pipelines:** Built **Retrieval-Augmented Generation (RAG)** pipelines using **Pinecone** for vector storage, enabling accurate semantic retrieval over thousands of documents and structured data sources.
 - Live Voice & Video Transcription:** Integrated **Whisper**-based speech-to-text pipelines for live voice and recorded video transcription, supporting multilingual inputs and near real-time processing.
 - Asynchronous AI Workflows:** Implemented background processing using **Temporal** and **RabbitMQ** to handle transcription jobs, model inference, and external API calls, improving throughput and fault tolerance.
 - Cloud Deployment:** Deployed containerized AI services using **Docker** on **AWS**, supporting scalable inference workloads and handling **thousands of AI requests per day** across client applications.
- Turing** Remote
AI / Machine Learning Engineer Jan 2024 - Feb 2025
 - Model Development:** Built and fine-tuned machine learning and deep learning models for real-world datasets, focusing on classification, NLP, and language understanding tasks.
 - NLP & LLM Fine-Tuning:** Worked with **BERT** and **GPT-based models** for text generation, summarization, and contextual understanding across multiple problem domains.
 - Data Preparation & Evaluation:** Performed dataset preprocessing, feature engineering, and model evaluation to improve model accuracy and generalization performance.
 - Production Readiness:** Collaborated with distributed teams to prepare models for production use, emphasizing reproducibility, inference stability, and performance benchmarking.

PROJECTS

- Listen – Live PSL Sign Language Interpreter:** Built a real-time Pakistan Sign Language interpreter using computer vision and deep learning. Implemented hand landmark detection and gesture classification to convert signs into text and speech.
- Skin Cancer Classification System:** Developed a medical image classification system using **MobileNetV2** and **EfficientNetB0**, applying transfer learning and data augmentation to improve diagnostic accuracy.
- Tweet Generation System:** Fine-tuned **BERT** and **GPT-based models** on large tweet datasets to generate coherent and context-aware social media content.
- RVio – AI-Powered Inventory Assistant:** Built an AI-driven inventory assistant using **RAG (Retrieval-Augmented Generation)**, enabling natural language querying over structured SQL data sources.

INTERESTS

- Hobbies:** Gaming, Chess, Playing Guitar, Traveling, Documentaries, Movies
